

std::false_type

```
graph BT; A["testing::internal::is_callable_r_impl<Void, R, F, Args>"] --> B["std::false_type"]
```

The diagram illustrates an inheritance relationship. At the bottom is a gray box representing the base class `testing::internal::is_callable_r_impl<Void, R, F, Args>`. A blue arrow points upwards from this box to a white box at the top representing the derived class `std::false_type`. Both boxes are divided into three horizontal sections.

testing::internal::
is_callable_r_impl<
Void, R, F, Args >
