

gmock_test_utils.TestCase

```
classDiagram
    class gmock_test_utils_TestCase["gmock_test_utils.TestCase"]
    class gmock_output_test_GMockOutputTest["gmock_output_test.GMockOutputTest"]
    gmock_output_test_GMockOutputTest --|> gmock_test_utils_TestCase
    gmock_output_test_GMockOutputTest + testOutput()
```

The diagram illustrates a class hierarchy. At the top is the base class 'gmock_test_utils.TestCase', represented by a white box with a thin black border and two empty internal compartments. Below it is the derived class 'gmock_output_test.GMockOutputTest', represented by a gray box with a thin black border and two internal compartments. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating inheritance. The bottom compartment of the derived class box contains the text '+ testOutput()'.

gmock_output_test.GMockOutputTest

+ testOutput()
