

std::false_type

```
classDiagram
    class std_false_type["std::false_type"]
    class testing_internal_IsRecursiveContainerImpl["testing::internal::IsRecursiveContainerImpl< C, false >"]
    testing_internal_IsRecursiveContainerImpl --|> std_false_type
```

The diagram illustrates an inheritance relationship. At the top is a white box representing the base class `std::false_type`, which is divided into three horizontal sections. Below it is a gray box representing the derived class `testing::internal::IsRecursiveContainerImpl < C, false >`, also divided into three horizontal sections. A blue arrow with a hollow triangular head points from the top of the gray box to the bottom of the white box, indicating that the gray class inherits from the white class.

testing::internal::
IsRecursiveContainerImpl
< C, false >
