

gtest_test_utils.TestCase

```
classDiagram
    class TestCase {
    }
    class GTest {
        TestFilterTest
    }
    GTest --|> TestCase
```

The diagram illustrates a class hierarchy. At the top is the 'gtest_test_utils.TestCase' class, represented by a white box with a thin grey border. It contains two empty rectangular slots. Below it is the 'gtest_testbridge_test.GTest' class, represented by a grey box with a thin grey border. It contains the text 'TestFilterTest' and a method signature '+ testTestExecutionIsFiltered()'. A blue arrow with an open triangular head points from the 'GTest' class up to the 'TestCase' class, indicating that 'GTest' inherits from 'TestCase'.

gtest_testbridge_test.GTest
TestFilterTest

+ testTestExecutionIsFiltered()
